

EMECS 7
TECHNICAL SESSION 3 Co-hosted by LOICZ

May, Wednesday 10th 09h30 to 12h10

1 -

Kremer Hartwig

2 Spatio-temporal scales in estuarine conservation and restoration

Ducrotoy J-P, Dauvin J-C

3 Monitoring strategy of the coastal Black sea ecosystems

Rudneva Irina

4 Outline of the Ago Bay Environmental Restoration Project

Kato Tadaa

5 Environmental Monitoring System of Ago Bay

Chiba Satoshi

6 Les nouveaux outils de gestion de l'interface littorale : La mission Inter-services de la Mer et du Littoral (MIMEL)

Schott Cyrille

7 Possibilities of the commercial use of the arctic cisco (*coregonus autumnalis pallas*, 1776) on the feed places in the Kara and Barents seas

Novoselov Alexander

May, Wednesday 10th 14h10 to 17h00

8 Towards management of coastal ecosystems: reference conditions, quality classes and modelling marine vegetation.

Riemann Bo

9 The effects of benthic organisms on sediment erodability in intertidal systems: What effects are relevant for what objectives?

Orvain Francis

10 Conservatoire du Littoral involvement in the BRANCH European project to integrate the climate change impacts in the management of the biodiversity

Rauss Isabelle

11 A Strategic Approach to Comprehensive, Spatially-Explicit and Ecosystem Process-Based Restoration of Nearshore Puget Sound (USA)

Simenstad Charles A.

12 Proposal for the Restoration of the Seto Inland Sea, Japan based on a new concept of "Sato Umi" with special emphasis on biological diversity and productivity

Matsuda Osamu

13 New technology for developing biologically productive tidal flat with use of muddy dredged sediment in Ago Bay, Mie prefecture, Japan

Kokubu Hideki

14 Evaluation of the metallic contamination along the Corsican coastline using *Posidonia oceanica* meadow (Mediterranean)

Lafabrie Céline

<http://emecs7.free.fr>

Tel. 0033 674 878 821

Fax. 0033 231 360 101

gemel.leclere@tiscali.fr

May, Thursday 11th 09h20 to 12h00

15 Mega-Scale Marsh Restoration In Chesapeake Bay Using Dredged Materials.

Stevenson J. Court

16 Development of an underwater video system for the observation of coastal benthic vegetations

Hayashizaki Ken-Ichi

17 Estimation of *Posidonia oceanica* litter deposits on beaches : Example of the Calvi bay
(Mediterranean Sea, Corsica)

Leoni Vanina

18 Assessment of the Bioresource Sustainability in Marine Coastal Waters: An Attempt Based on
Retrospective Studies

Fujii Naoki

19 Modelling travel and residence times in the eastern Irish Sea

Dabrowski Thomas

20 "Sato-Umi" :: New concept for the coastal sea management

Yanagi Tetsuo

21 SAV Resurgence after Dredging: A Case Study of Five Waterways in Baltimore County, Maryland

Croswell Candace L.

May, Thursday 11th 14h00 to 17h00

22 New measures for the area-wide total pollutant control system in Japan

Takahashi Yasuo

23 New approaches to estimation of permissible discharges of biogenic matters to water bodies
(example of the Neva estuarium of the Baltic sea)

Tsvetkova L.I

24 Ecohydrology as a new tool for sustainable management of estuaries and coastal waters

Wolanski Eric

25 Dredged sediment applications for making micro-habitat pellets and bases for seagrass germination
in Ago Bay, Japan

Ahmed Dabwan

26 Multifunctional Use of Innovative Flood Risk Management Treatments

Colclough Steve

27 Planning and management of eutrophic wetland by using Pamolare Model Anzali wetland as a case
study

Ramin Maryam

28 Extreme storm surge distributions and practical applications at Marseille (France)

Gaufres Pierre

29 The restoration of gauging embankments IN THE Seine Estuary (France)

Delouis A.

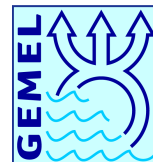

<http://emecs7.free.fr>

Tel. 0033 674 878 821

Fax. 0033 231 360 101

gemel.leclere@tiscali.fr

May, Friday 12th 09h40 to 12h00

30 Management of domestic/industrial wastes in enclosed coastal seas.

Enekwechi Ephraim Kanayochukwu

31 The assessment of marine pollution risks and monitoring of the Gulf of Riga

Looring Merle

32 Satellite monitoring of oil pollution in the European Coastal Seas

Kostianoy Andrey G.

33 Marine spatial planning pilot project

Frost Natalie

34 Application of the Adaptive Management Approach to a tidal flat constructed in the Amagasaki Harbor

Nakamura Yoshiyuki
